

**Project : Enhancement to ProxyMITY
on Aakash Tablet**

Summer Internship 2013

Weekly Report on Project

By

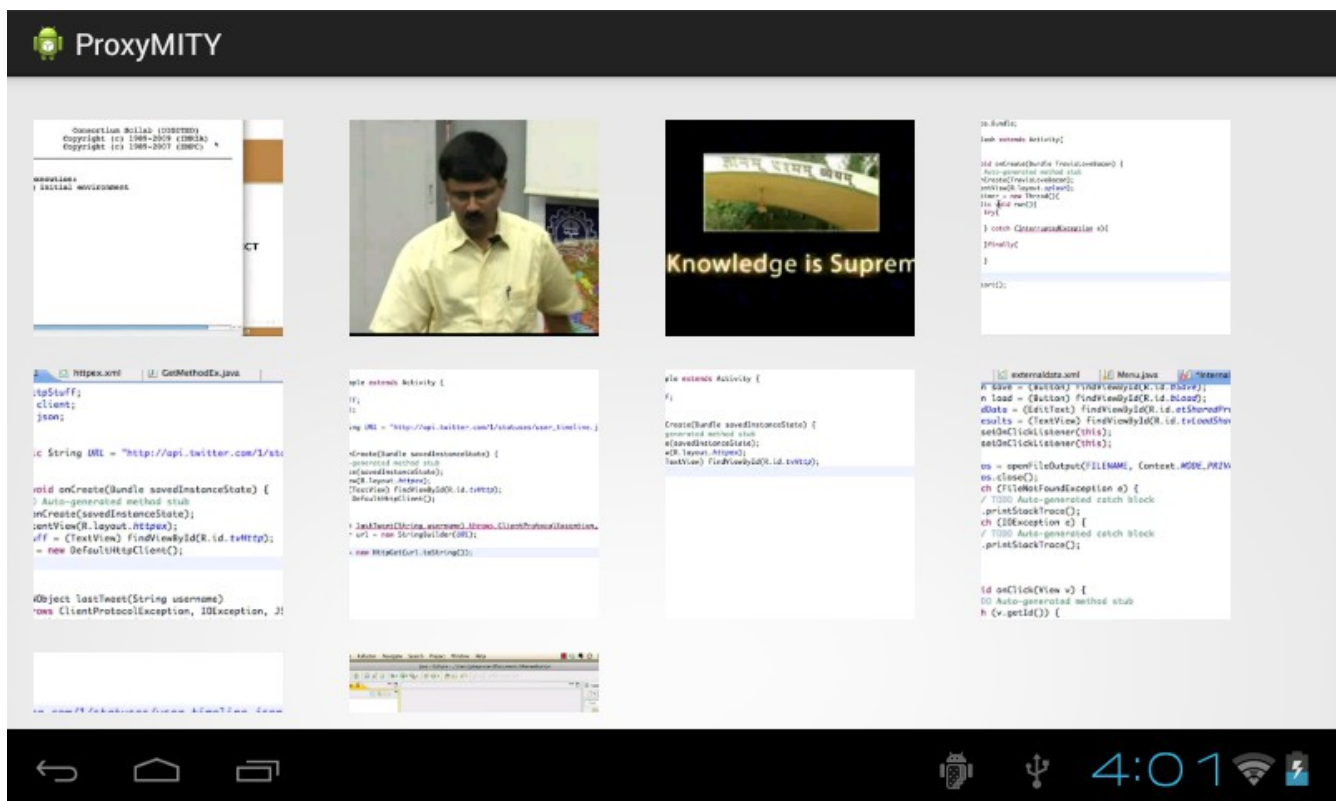

Ankit Yadu

From the date of joining i.e. on May 20, 2013 till today, I have been working on this project with other 3 members of my team.

The task assigned to me with their corresponding status are:

- Main Screen(completed)

- It consists of Thumbnails of video lectures, their layouts, and handling click events on them

- Working on Fragments for Second Screen to optimize the view with less coding and easy handling of layout
- Working on Transcripts to synchronize it with their corresponding video in Second Screen and making text clickable, that will make the video jump to that particular portion.
